## Press Release...for immediate release

One of the UK's largest manufacturers and suppliers of cast iron products opens in Holsworthy

Tuscan Foundry Products, one of the UK's largest manufacturers and suppliers of traditional cast iron rainwater goods, radiators and conservation rooflights is opening a branch in Holsworthy. The socially responsible company that also supports The Woodland Trust and The Society for the Protection of Ancient Buildings (SPAB) will be occupying one of the units at the Tamar Business Park, recognised for its sustainable construction.

The branch has opened due to the demand for conservation products in the South West which are required for renovations and refurbishment of the many period buildings in the surrounding historic cities, thatched villages and stately homes. Local construction businesses and consumers will benefit from being able to walk in, view the products and same day collection.

Paul Trace, Managing Director of Tuscan Foundry Products enthuses:

"I am delighted that Tuscan Foundry Products is expanding in the South West as we have a huge amount of orders from this area for heritage projects which require recommended conservation products. Recently we supplied a number of British made conservation rooflights chosen for their low profile for a Grade II stable conversion at Youlston Park Country Manor."

Tuscan Foundry Products' South West branch will be open from Monday 22<sup>nd</sup> May 06 at Unit 8, Tamar Business Park. The unit is super-insulated and clad in home grown Douglas Fir and reclaimed brickwork.
