

## TUSCAN FOUNDRY PRODUCTS

Tuscan Foundry Products, one of the UK's largest manufacturers and suppliers of traditional cast iron rainwater products, cast iron radiators and the Lumen conservation rooflight, is delighted to have moved its main office to Tamar Business Park to merge with its Holsworthy branch.

Both builders and homeowners alike are warmly invited to Tamar Business Park to view Tuscan Foundry's extensive range of products at the new showroom.

Renowned for its expertise in conservation products, Tuscan Foundry Products aims to meet the growing demand for sought after heritage products for the renovation and refurbishment of historic and period buildings within the area.

Replicating traditional designs from the Victorian era, Tuscan Foundry Product's cast iron radiators heat any sized room efficiently. The stylish Victorian appearance brings a touch of historical authenticity to both period and contemporary settings. The elegant 'Nouveau' model is enhanced by a scrolled relief pattern, making it an eye-catching centrepiece for any period-styled interior.

Reproduction radiators are available in sections and come with the option of an independent heating element. A wide range of solid brass, nickel or chrome radiator valves are also available to suit both contemporary and traditional interiors.

Tuscan Foundry Products boasts a comprehensive range of traditional cast iron rainwater systems, cast iron gutters, cast iron pipes and fittings. Their cast iron guttering comes in 19 different profiles, along with 3 different cast iron pipe profiles and more than 100 ornamental

rainwater hopper heads characterised by their strength and durability. Their rainwater systems are expected to last for more than 100 years in normal conditions, making them a cost-effective option for all homeowners.

In addition, Tuscan Foundry's Lumen Rooflight replicates a traditional Victorian design, which is unobtrusive and sympathetic to a building's original external architecture yet offers a high specification of glazing by incorporating Pilkington Activ - the world's first self-cleaning glass.

With its fine lines of steel, the Lumen Rooflight has a low profile and features a genuine glazing bar. It is manufactured in Great Britain and is hand finished using traditional craftsmanship. Available in standard or bespoke sizes, it offers a choice of mechanisms to suit both traditional and contemporary interiors.

Paul Trace, Managing Director of Tuscan Foundry Products comments; "I am delighted that we are now based in the South West. A large number of our orders already come from this area, for example, we recently supplied our British made conservation rooflights for the Grade II stable conversion at Youlston Park. In addition, our new showroom allows homeowners to come on site and see the products we offer, perfect for both traditional and contemporary settings."

For all standard stock products Tuscan Foundry Products endeavours to get your order to your home or site within 5 working days. Many of their products can be supplied on a next day basis subject to an extra carriage charge.

Come and see for yourself. Tuscan Foundry Products is at Unit 8 Tamar Business Park, down the third road on the left after you enter the Dobles Lane Industrial Estate just off the Bideford Road on the outskirts of

Holsworthy. The showroom is open between 8.30 am and 5.00 pm Monday to Thursday and 8.30 am – 4.00 pm on Fridays. For more information, just call 01409 255 403 or visit Tuscan Foundry Products online at [www.tuscanfoundry.com](http://www.tuscanfoundry.com).
