VALVES & ACCESSORIES

VALVES & ACCESSORIES

All radiators require a valve and lockshield. The actual valve, to allow and adjust the flow of water into the radiator, and a lockshield at the other end to regulate the flow and isolate the radiator if, for instance, any maintenance work is required.

EMPIRE, UNION, TRADITIONAL AND EASICLEAN are solid brass hand made radiator valves and lockshields. Reproduced from originals of the 1920's and 1930's they are engineered and hand made in Great Britain to an extremely high standard.

BUCKINGHAM, WINDSOR, HIGHGROVE, AND RICHMOND are solid brass hand made radiator valve and lockshield sets. Smaller in size than the EMPIRE and UNION, they offer the same high quality and excellent value.

For more information and details on our complete range of valves and accessories please call our showroom on the number below.
